**SOFTWARE AS A SERVICE**

## PROCESS MANAGEMENT AS A RENTAL PLATFORM

Quickly establishable software processes, a connection to existing hardware and software as well as a clear monthly cost structure - process management has never been so easy as with our JAMES SaaS concept.

Do without hardware that has to be maintained by your IT and outsource the hosting of your software securely and conveniently. In addition, take advantage of all the benefits of cloud-based process and data management and the many possibilities offered by JAMES, such as using your own hardware (bring your own device) for certain processes.

In this brochure you will find specific information that JAMES as SaaS solutions has in store for you. Please do not hesitate to contact us if you have any questions regarding the field of application and the functional scope of a hosted solution.

**Browser-based** visitor management software for managing all visitor processes

**Online platform for visitors** for independent registration, appointment management and upload of documents in advance, etc.

**Web app for visitor pre-registration** via mobile devices. Visitors can register from anywhere and from any device.

**Responsive web design** can be used on all end devices

**Central data storage**  
Customers with distributed offices can host JAMES centrally and make it available to all users

**Adhoc implementation** of visitor processes tailored to your requirements and needs

**Outlook Plugin** for a simple, Office compliant workflow

**Connection to Microsoft Active Directory** for user authentication and synchronization of Users and groups

**Kiosk systems for autonomous reception** / as digital gatekeeper (self check-in, information and visitor panels)

**Data protection conformity (GDPR)** for your business processes - without clipboard and Excel tables

**Public, Private and Hybrid Cloud**  
There are various hosting options available for JAMES - according to your individual needs and IT policy

Full cost control at any time through **transparent rental model**

## „SOFTWARE AS A SERVICE“ THE JAMES PRINCIPLE

Our rental and hosting platform allows a quick start into visitor management. Not only do you save costs in the acquisition of licenses and hardware, but you can also establish new processes agilely and without much lead time. Visitors are able to register themselves via the online platform or complete training and instruction before their visit. This saves time and relieves your reception desk.

The cloud-based approach allows users with distributed branches to host JAMES centrally and make them available to all users. This allows you to manage and coordinate appointments centrally. No matter whether public, private or hybrid - depending on your individual needs or your IT policy, there are various options available to you. Our transparent rental model gives you full cost control at all times.

For security reasons, some functions are only available in on-premise operation. Unfortunately, the license categories Enterprise and Project are not available here. These are not designed for use in hosting, as the requirements for such systems require use on hardware or in the customer's infrastructure. Of course, migration from the cloud to an on-premise installation is possible at any time. *If you have any questions, please contact our sales or support team.*

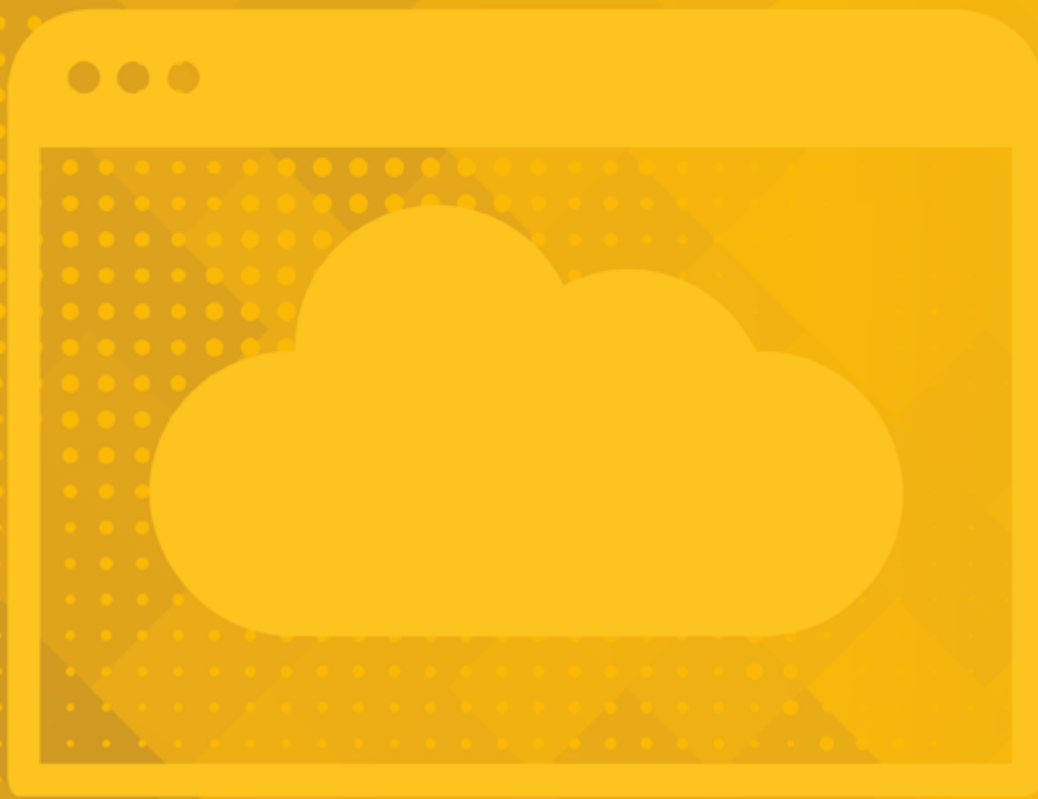

# JUNIVERSE

## DISCOVER THE JUNIVERSE

Discover the various features and modules of JAMES and use the feature configurator to plan your individual projects and processes.
